LEAD NURSE FOREWORD

What an incredible day we had at the GPN conference. Our vision was to create an event that was informative, showcased health improvement innovation, celebrated general practice nurses and provided lots of networking opportunities that facilitated inspiring conversations. I think its safe to say, we smashed it!

Huge thanks to all our speakers who presented some incredibly inspiring stories of their aims, experiences and achievements in improving the health

of our population, despite the daily challenges primary care brings.

We heard about the GPN strategy and invited delegates to tell us what they want to see in the strategy and how it can best reflect the needs of our localities. Your feedback will help to shape the strategy.

Thanks again to all who attended and supported, making this event a huge success.

We look forward to the next one!

“Great turnout for GPN conference 2024– Thank you for being a part of the day.”

EVENTS

We loved the GPN conference so much we are doing it all again!!

Watch out for news about our next conference at the end of November 2024.

This conference will have a focus on education, especially managing long term conditions and ageing well.

The Malawian UK Nurse Association Conference Friday 28th June 2024, at the Marcus Garvey Centre in Nottingham from 9:30-16:00.

ALL THE LATEST ACROSS THE ICS

THANK YOU for all those who completed our **GPN survey**. We had 115 responses. We will analyse the findings and let you know the results. We plan to share the information, your insights and what you said about the challenges in your role with the clinical leaders across the Nottingham and Nottinghamshire ICS.

Did you know that the ICS has set out the **NHS JOINT FORWARD PLAN for 2023-2027**? This strategy retains 3 strategic principles:

PREVENTION is better than cure

EQUITY in everything

INTEGRATION by default

The NHS focus areas are:

1. Prevention: Reduce physical and mental illness and disease prevalence
2. Proactive management of long-term conditions and frailty
3. Improve navigation and flow to reduce emergency pressures
4. Timely access and early diagnosis for cancer/ planned care
