EXECUTIVE SUMMARY (OVERVIEW):
<p>“Integrating care - Next steps to building strong and effective integrated care systems across England” describes options for giving ICSs a firmer footing in legislation likely to take affect from April 2022 (subject to Parliamentary decision). These proposals sit alongside other recommendations aimed at removing legislative barriers to integration across health bodies and with social care, to help deliver better care and outcomes for patients through collaboration, and to join up national leadership more formally. NHS England and NHS Improvement invited views on these proposed options from all interested individuals and organisations by Friday 8 January.</p> <p>Individuals and organisations were given the opportunity to respond to the following four questions in the Integrating Care document:</p> <ol style="list-style-type: none"> 1. Do you agree that giving ICSs a statutory footing from 2022, alongside other legislative proposals, provides the right foundation for the NHS over the next decade? 2. Do you agree that option 2 (a statutory ICS body) offers a model that provides greater incentive for collaboration alongside clarity of accountability across systems, to Parliament and most importantly, to patients? 3. Do you agree that, other than mandatory participation of NHS bodies and Local Authorities, membership should be sufficiently permissive to allow systems to shape their own governance arrangements to best suit their populations needs? 4. Do you agree, subject to appropriate safeguards and where appropriate, that services currently commissioned by NHSE should be either transferred or delegated to ICS bodies? <p>I spoke informally to partners in the Mid Notts Integrated Care Partnership and we supported the answer of “yes” to all four questions.</p>
